

User Manual / Installation Guide

wavearsLE for Mac OS X

How to install

Once you have downloaded wavearsLE please follow the instructions in the installer guide.

wavearsLE is designed to have a high impact on sound, but run discreetly in the background. It appears as a small application located in the system wide status bar and loads automatically on OS X startup. If you want to remove it from the automatic startup go to OS X System Preferences->Accounts, select the Login Items tab and deselect the wavearsLE check box. You can manually start wavearsLE by double clicking the application which is located in the User->Applications folder under wavearsLE.

How to use

Start your player and choose the song, video etc. that you would like to play. wavearsLE is continuously running in the background by default.

1. Click on the wavearsLE-Icon above in your Status Bar to open wavearsLE.
2. By moving the slider up and down your can control the degree of externalization that is applied to your audio.
3. By clicking on the sonic emotion logo you can turn the externalization effect on and off (bypass).

For further questions please visit www.sonicemotion.com/FAQ_mac.

Please note: wavearsLE was developed for use with headphones
