

# User Manual / Installation Guide

## wavearsLE for Windows Vista

### How to install

Once you have downloaded wavearsLE you can start the installation process.

Sometime during the installation a second installation process will start. Please complete this process as well. It is for the virtual sound driver, which is necessary for running the plug-in.

wavearsLE is designed to have a high impact on the sound, but run discreetly in the background. It appears as a small application located in the Windows Taskbar and starts up automatically with Windows. If you want to remove it from the automatic startup please go to the 'Windows Start Menu' and delete it from the 'Startup' folder. You can manually start the application by opening the wavearsLE program, which is located in the in the 'All Programs' folder under wavearsLE.

### How to use

Start your player and choose the song, video etc. you would like to play. wavearsLE is continuously running in the background by default.

1. Click on the wavearsLE icon on the taskbar to open wavearsLE.
2. By moving the slider up and down your can control the degree of externalization that is applied to your audio.
3. By clicking on the sonic emotion logo you can turn the externalization effect on and off (bypass).
